Dealing with diversity - in MAP composition

Guiding question:

Do we cover all significant perspectives?

- Stakeholders
- Different types of rurality
- Different sectors
- Gender

Continuous question:

Are we missing any perspectives?

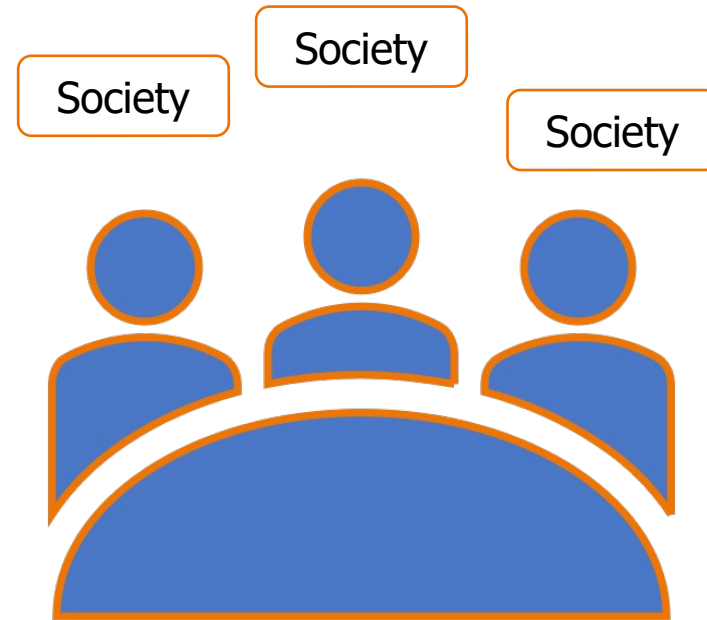

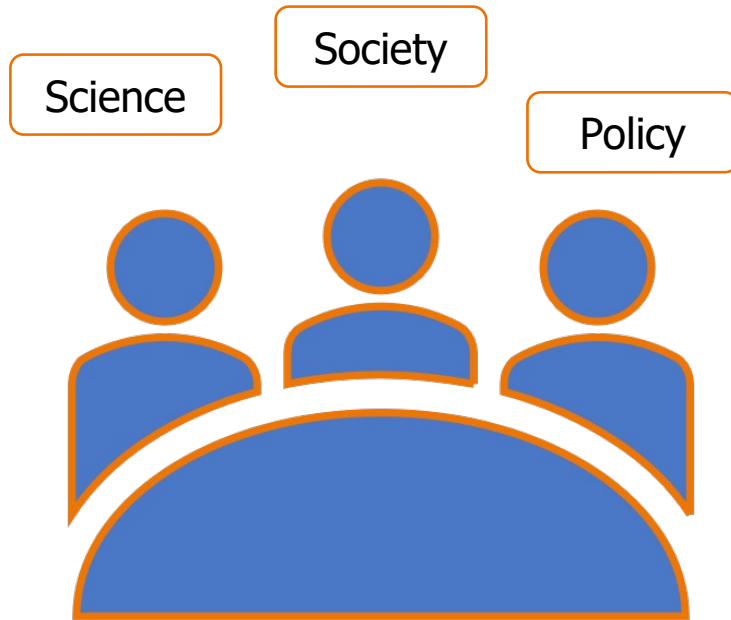

- Youth

Dealing with diversity – in MAP meetings

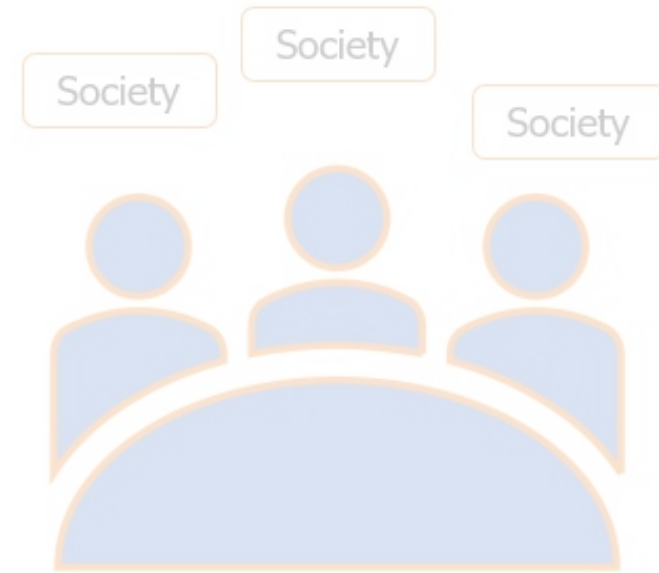

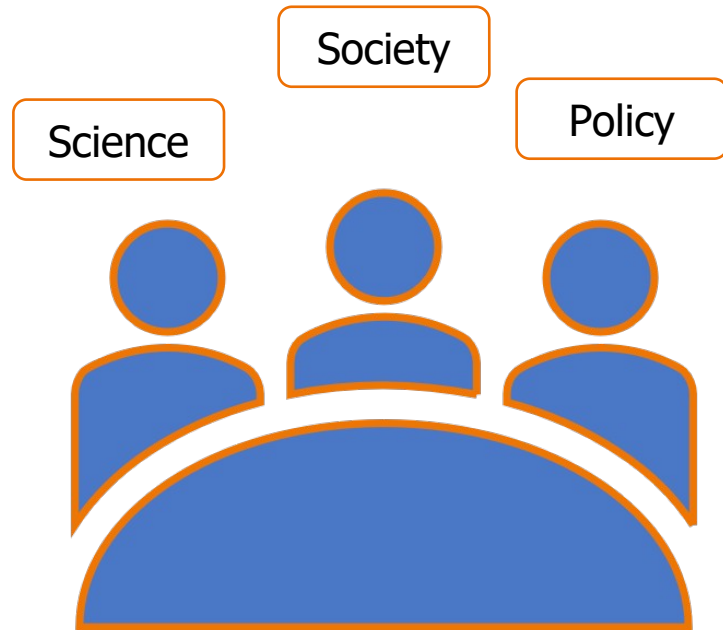

How to facilitate the best discussions?

Dealing with diversity – in MAP meetings

Our model in the end for online workshops.

Next cycle: try different models

Dealing with consensus

Some MAP members objected to the heading of the meeting as 'consensus'. This produces the idea, that all MAP members in the end decided to agree on certain stands, however this is not the case.

Question: *How did you deal with the topic?*

- Questioning the aim:
 - Is consensus between MAP members the objective? Is this reasonable, realistic?
- Purpose :
 - Create interfaces between science, society and policy
 - Share ideas and talk across sectors and perspectives
