## SHERPA FINAL CONFERENCE

SHERPA Final Conference will take place on 1-2 June 2023, at the European Committee of the Regions, Brussels (Belgium).

Since October 2019, SHERPA has worked on formulating recommendations for the future of rural areas in a variety of [Key Logics](#). SHERPA has also accompanied the development of the [EU Long-Term Vision for Rural Areas](#) with the ambition to contribute to future rural policies. The SHERPA Final Conference will provide the final opportunity to look back at the work done and identify, by using a co-creative participatory approach, the main SHERPA recommendations, as well as reflect on the methodology of using [Science-Society-Policy interfaces](#). This will be facilitated by gathering members of all its [41 Science-Society-Policy interfaces](#) in Brussels, which will also allow them to interact with each other directly and jointly decide the final messages of the project.

Participants will have the opportunity to:

- Co-create SHERPA's contribution to the [EU Long-Term Vision for Rural Areas](#), with a specific focus on the potential adjustments of the EU [Rural Action Plan](#).
- Co-create SHERPA's recommendations for the wider policy framework, with a specific focus on the policy orientation for the next EU policy cycle (i.e. after 2027).
- Explore how the [Science-Society-Policy interfaces](#) created in SHERPA can continue to contribute to rural policies after the end of the SHERPA project in September 2023.

*Simultaneous interpretation in English, French, Spanish, Polish and Romanian.*

Registrations will close by 25 May.

### RURAL CORRIDOR

Throughout the entire duration of the SHERPA Final Conference, a Rural Corridor will be established. The primary objective of this corridor is to **foster networking, encourage knowledge transfer, and facilitate new connections** for future collaborations. Within the Rural Corridor, attendees will have the opportunity to discover SHERPA's main thematic outputs and engage with other European-funded projects.

*SHERPA thematic outputs*

- SHERPA Repository
- Social Dimension of rural areas
- Digitalisation in rural areas
- Climate change and land use
- Sustainable and resilient value chains
- Multi-level governance
